ABSTRACT

A study was conducted in Chittoor district of Andhra Pradesh with an objective to identify the correlates of change in attitude of dairy farmwomen due to training programmes . The experimental design “ One group before and after was adopted . The study revealed that about 15% improvement in the level of attitude of dairy farmwomen towards the scientific dairy farming was due to training . The study established the relationship between economic motion and attitude towards dairy farming ; which could serve the policy makers and extension workers as guidelines for promoting dairy farming in other parts of the Country .

Key words : Dairy Farm
