## **ABSTRACT**

A field experiment was conducted at S.V. Agricultural College, Tirupati (ANGRAU), during *rabi* season of 2012 -13 to study the response of groundnut genotypes to the nutrient levels. The findings of the experiment revealed that the growth, yield attributes and yield were higher with the genotype TCGS-1073 than Rohini, Greeshma and TCGS-1043. Application of 150 % RDF recorded the highest growth, yield attributes and pod yield of groundnut than application of 100 % RDF@ 30:40:50 kg N, P<sub>2</sub>O<sub>5</sub> and K<sub>2</sub>O ha<sup>-1</sup>.

**Key words :** Groundnut genotypes, Nutrient levels, Yield.
