ABSTRACT

A field experiment was conducted during *Rabi* season of 2000-01 at Regional Agricultural Research Station, Lam to study the effect of Integrated Nutrient Management on growth and yield of Coriander (*Coriandrum sativum* L.). Results of the study revealed that combined application of inorganic, organic and biological sources of nutrients (T_1 – 100% RDN + FYM @ 5 t/ha + *Azospirillum*, T_2 – 75% RDN + FYM @ 5 t/ha + *Azospirillum*, T_3 – 50% RDN + FYM @ 5 t/ha + *Azospirillum*) recorded significantly superior growth and yield over control, T_0 (100% RDN).

Key words : Coriander , Integrated Nutrient Management.
